

Australian Anniversary

THE PEOPLE OF AUSTRALIA recently observed the 155th anniversary of the entry of their country into the orbit of the British Crown. This anniversary is called "Australia Day" and it was celebrated this year for the first time since the end of the war. From Canada, and many other parts of the Empire, messages were sent, expressing the hope that Australia would enjoy increased progress and prosperity in the future, and paying tribute to her war effort. After the opening of the campaign in the Pacific, Australia was in direct danger of air attack or possible invasion by the Japanese, and her forces played a major role in many of the decisive victories in that area, as well as in other theatres of war. It is agreed that the Australian campaigns in New Guinea brought about the turning point in the war against Japan, and that Australian ground and air forces at Papua inflicted the first decisive land defeat suffered by the Japanese.

Large Numbers In Services

From a population of 7,300,000 people, Australia had a fighting force of one million men. Two out of every three Australian men between the ages of eighteen and forty, served in the army, navy or air force. Civilian defense workers numbered 300,000 and there were 666,000 women in the auxiliary fighting services. Casualties totalled 95,561, of which 59,203 occurred in the fighting against Japan, and 36,358 in the war with Germany. Seventeen Victoria Crosses were awarded to members of the Australian armed forces. Other figures show that Australia spent the sum of \$7,599,600,000 in the prosecution of the war, and that twenty-one ships of the Royal Australian Navy were lost. Australian forces contributed much to the spectacular campaigns in Africa and the Middle East, before the opening of the war in the Pacific, and all branches of their service received commendation from the Allied nations.

Bonds Between Two Nations

As is the case with Canada, Australia's part in the war has brought about a fuller realization of her nationhood and of her responsibilities in securing lasting peace. Because of her isolated position Australia has every reason to be deeply concerned with the settlement of world affairs and especially with matters affecting the Pacific area. During the war, thousands of Australian airmen were trained in Canada under the Commonwealth Air Training Plan and through them many Canadians became more familiar with the life and problems of their homeland. Members of our fighting forces also were in close contact with Australians in the fighting fields. Further evidence of good will and co-operation between the two nations was evident during the recent UNO meetings in London, and it is to be hoped that this spirit will grow in the post-war relations between these two important nations of the British Commonwealth.

Newspaper Advertising

Nothing Can Beat It For Introducing A New Product

Newspaper ads in four New York papers by a department store introducing a new type of pen guaranteed to write for two years without refilling drew more than five thousand customers the next morning. Crowds five deep mobbed the pen counter, and the store was swamped with telephone and mail orders for the new product. Fifty thousand of the new pens had been sold within the first two weeks—all the factory could produce. There's nothing like a newspaper advertisement to introduce a new product.

To Fight Sawfly

Communally Action Necessary To Eliminate The Pest

Extensive experiments have been undertaken by the Experimental Station, Swift Current, Sask., to learn more of the factors influencing sawfly infestation in wheat crops. In heavily infested sawfly areas it was proved conclusively that community action rather than individual effort was necessary to eliminate the pest. Time of seeding experiments for 17 years at the Station determined the policy in relation to farm planning. The results show that oats should be seeded first, barley second, flax third, and wheat last. This sequence of seeding has given the best results and its application minimizes the sawfly damage. The returns from oats and barley have been just as profitable as from wheat. Therefore, as oats and barley are resistant to sawfly, they were recommended in place of wheat for the 1945 crop. Widespread adoption of these results has been accepted by farmers in the brown soil area.

HIS CONTRIBUTION

The government conservationist was speaking in the village community hall.

"I am here this evening," he said, "to call to your attention the preservation of our forest wealth. . . . Is there a man or woman here this evening who has ever done anything to save the life of a tree?"

A little man in the rear of the hall stood up timidly and called: "I once shot a woodpecker." 2659

Price Control And Rationing Information

Q.—I read in the paper that but-ter coupon No. 139 becomes valid on February 7. As this is the last but-ter ration coupon, what will we use for the purchase of butter?

A.—The blue "R" coupons in ration book 5 will be used for the purchase of butter, with the first of these, R-1, becoming valid on February 11.

Q.—Will the Wartime Prices and Trade Board set the prices on nylon stockings?

A.—Yes, the Wartime Prices and Trade Board have set a price that will be uniform across Canada ranging from 85c to \$2.50, according to their quality. Each stocking must be stamped with the government word "nylon".

Q.—Would you please explain the law regarding giving out rationed commodities without coupons? I know of an instance where a woman bought butter at a store and told the clerk she would give her coupons when they came due two days later.

A.—The law regarding the purchase of rationed commodities is very simple. You must surrender the correct number of coupons when the purchase is made otherwise it is an illegal transaction. The grocer who sold this butter was breaking the WPTB regulations when he failed to collect the coupons and the person who bought the butter was also breaking the regulations.

Q.—I lost my ration book with several unused valid coupons. When I obtained a new book coupons were removed. Why is this?

A.—It would be difficult to check on the number of unused coupons and the ration administration believes that if you did not use these coupons when they became valid you did not require the rationed commodities.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

SALT AND PEPPER

Newsweek says when Claude Pepper was attending Harvard University he happened to sit next to an English fellow student at lunch. "My name is Pepper," the future U.S. Senator said, introducing himself. "Are you joshing me?" the Englishman asked. "My name is Salt." Recently Salt and Pepper met again when H. E. Salt, now a barrister at Lincoln's Inn, entertained his former schoolmate in a London club.

A REAL LOSS

Arturo Pomar, 14-year-old Spanish chess expert, lost one of his favorite possessions in London—a set of plain wood chessmen he had owned since he was six years old. He left the set in a taxicab.

ABOUT THE ESKIMO

Says They Are The Kindest And Most Courteous People

Lt.-Col. Graham Rowley, MBE, of Ottawa is the kind of man you most once in a lifetime—if you're lucky. The slight, 33-year-old Arctic adventurer, who spent a year on the Ross Island and the north Hudson Bay area, lived and slept with the Eskimos for two years.

He left with the impression that the Eskimos are the kindest, most courteous people he has ever met. The Eskimo is also extremely intelligent," he said. "He has to be, or he wouldn't be able to survive."

With the Eskimos Col. Rowley learned to subsist on a straight meat diet—preferably walrus, but deer and seal are good too. Fifty per cent of the meat is eaten raw, the rest is cooked.

And you don't chew, Col. Rowley said. "You just bite off a chunk and let it sail down," says the Manchester, England, native who "blundered" into exploring after receiving a degree in archaeology from Cambridge University.

Appointed to command the Baker Lake force which will act as a refueling base for R.C.A.F. Dakota supply planes when the 3,200-mile Musk-Ox expedition reaches Cambridge Bay, about mid-March, Col. Rowley said the Eskimo languages and religion are two intriguing developments of the race.

Salada Tea Sales

Advertising Lower, Instead Of Increasing The Costs

A letter from the gentlemen who control the destiny of this great organization—very large in the U.S.A. "Hello well in Canada" says in part. "Newspapers have been the backbone of 'Salada' advertising for nearly fifty-four years so you will be interested to know that last year saw our greatest sales volume beaten by nearly four million pounds. Thank you for the part your paper has played in this achievement."

Advertising cannot make a lasting success of goods offered to the public unless they themselves possess much merit—that "Salada" can point to such a record as above is a clear indication that they pack good, clean tea and that it suits a large section of the public taste.

Advertising in newspapers is valuable because it is read at leisure—there is no need to "catch it on the fly" and by repetition a trade name and the goods it represents becomes a very familiar reminder to buy—then if the customer is satisfied it is again a reminder to repeat sales.

And advertising lowers—instead of increasing costs—to consumers—by greater volume production.

SMILE AWHILE

"How does my dress look?" "It looks to me like three weeks' wages."

"The average woman has a vocabulary of only eighteen hundred words." It is a small stock, but think of the turnover.

An American doctor has discovered a new muscular affliction which he calls Italian lumbago. The first symptom is a sudden stab in the back.

"My husband is an efficiency expert in a large office." "What does an efficiency expert do?"

"Well, if we women did it, they'd call it nagging."

The young man was discussing his love affair with a sympathetic friend.

"You say she partially returned your affections?" asked the friend. "Yes; she sent back all the letters but kept the jewellery."

"Another new dress!" raved her husband. "Where do you think I'm going to get the money to pay for it?"

"That's your affair," replied the wife of his bosom. "I didn't marry you to give advice on financial matters."

"A more devoted couple I never met," said Mrs. Robinson to her neighbor. "They got so hot in an argument as to which one loved the other most that they're not on speaking terms."

Passer-by (to owner of old car) "Engine trouble?"

Owner: "Well, I can't tell until I walk back and find the engine."

"You seem very quiet tonight, Roland," said the pretty girl. "Are—are you sure you love me?"

"Love you?" Roland explained. "Good heavens, Rhoda, when we were saying good-bye at the gate last night your dog bit a piece out of my leg, and I didn't even notice it till I got home!"

"I'm proud to say I'm a self-made man."

"You're lucky. I'm the revised work of a wife and three daughters."

The simplest and most ordinary things are often the most difficult to grasp, says an article. Such as the soap in the bath.

LIFE can Begin AFTER 40, IF.

Around 40 our energy declines. But, experience has taught us to do our work with less effort. The years ahead should yield the greatest accomplishments, the most enjoyment and happiness. They can, too, if we avoid the kidney and bladder disorders such as Backache, Headache, Rheumatic Pains, Lassitude, Loss of Sleep and Energy which so often attack those around 40. For over half a century Dodd's Kidney Pills have been helping men and women to keep kidneys and bladder in good order. If you are nearing 40, or past it, for the sake of your health and a happier future use Dodd's Kidney Pills today! 125

Do You, Too, Suffer MONTHLY FEMALE PAIN

Then try this effective medicine! Lydia E. Pinkham's Vegetable Compound DOES MORE than relieve monthly pain when due to functional periodic disturbances. It also relieves accompanying weak, tired, nervous, jittery feelings—of such nature. Pinkham's Compound is one of the best known and most effective medicines of its kind!

GEMS OF THOUGHT

GOLDEN RULE APPLIED

Therefore all things whatsoever ye would that men should do to you, do even so to them; for this is the law and the prophets.—Matthew 7:12

To do as you would be done by, is the plain, sure, and undisputed rule of morality and justice.—Lord Chesterfield.

The crimes that are now being committed by man against man cry aloud not for vengeance, but for a complete change in our relationship one with another.—George Lansbury.

Mankind will be God-governed in proportion as God's government becomes apparent, the Golden Rule utilized, and the rights of man and the liberty of conscience held sacred.—Mary Baker Eddy.

Never, with the Bible in our hands, can we deny rights to another, which, under the same circumstances, we would claim for ourselves.—Gardiner Spring.

All are not just because they do no wrong; but he who will not wrong me when he may, he is truly just.—Cumberland.

Interchangeable lenses for various types of weather will aid pilots—clear lenses for wind protection; green for sunny skies, and amber for hazy days.

How You Can Get Quick Relief From Sore, Painful Piles

Most people seem to think the only way to get relief from their sore, painful piles is by local treatment. Local treatment may give temporary relief from the itching but you can easily see why such treatment will not correct the cause of your piles.

No lasting freedom from pile misery can be had unless the cause of the trouble is corrected. This is due to internal causes as the best way to get lasting relief is to treat them internally with a medicine like Hem-Roid.

Hem-Roid is a formula that has been used for over 40 years by thousands of pile sufferers. It is a small, highly concentrated tablet, easy and pleasant to use. This cleverly compounded tablet formula directs its medical action to the real cause of the piles.

NOTE: This generous offer is backed by a reliable firm doing business in Canada for a good many years. Hem-Roid must be your pile condition quickly, easily and pleasantly or your simple, easy test costs you nothing. Try it today.

Posed by a Professional Model

We invite you to try Hem-Roid and let it prove itself. You can make your test, in the privacy of your own home. NO COST! If you are not convinced that this is an amazingly easy and satisfying method of treating your sore, painful piles.

Get a package of Hem-Roid today from any drug store and use it as directed for JUST FIVE DAYS. At the end of that time if you are not absolutely sure Hem-Roid is the most effective pile treatment you ever tried, return the unused portion of the package to your drug store and he will promptly refund your money.

NOTE: This generous offer is backed by a reliable firm doing business in Canada for a good many years. Hem-Roid must be your pile condition quickly, easily and pleasantly or your simple, easy test costs you nothing. Try it today.

Easy Breathing

ITCH CHECKED in a Jiffy - or Money Back

For quick relief from itching caused by eczema, athlete's foot, scabies, rashes and other itching conditions, use pure, cooling, medicated liquid D. D. D. PRESCRIPTION. Greaseless and stainless. Soothes, comforts and quickly calms intense itching. Don't suffer. Ask your druggist today for D. D. D. PRESCRIPTION.

Canada Will Ship Wheat To United Kingdom

OTTAWA.—The trade department in the midst of preparing a world wheat shortage, puts its cards on the table with the announcement that Canada will have 140,000,000 bushels of wheat available for export between July 1 and July 31, the end of the crop year.

The statement, based on Canadian wheat board figures, followed an appeal by British Food Minister Sir Ben Smith that wheat exporting countries make an effort to send as much wheat as possible to meet the critical situation in Britain and of the continent.

In announcing the 140,000,000 bushel surplus, the statement said:

"Canada therefore has supplies of wheat in excess of minimum United Kingdom home requirements for the balance of the crop year and these supplies will be allocated to other countries through the cereal committee of the combined food board at Washington."

Canada's visible supply of wheat now is 164,000,000 bushels and an additional 53,000,000 bushels are expected to be delivered from the farms to the elevators during the remainder of the crop year, thus making the total 217,000,000 bushels. If 140,000,000 bushels are exported, 77,000,000 bushels then would remain to cover domestic requirements and a comparatively small carry-over as protection against a crop failure next year.

Canadian wheat and wheat in the form of flour have been moving overseas throughout the present crop year, which began Aug. 1 last. In the first six months to Jan. 31 about 200,000 bushels were exported, the bulk going to the United Kingdom.

The trade department statement came as reports from other world capitals told a story of sharply declining wheat stocks.

Under present plans, Canada will export in the current crop year 340,000,000 bushels of wheat and wheat flour, or more than 34,000,000 bushels in excess of this country's total crop in 1945, now estimated at 305,912,000. This will be possible only by drastically cutting the carry-over.

One problem in the maximum flow of wheat overseas will be transportation. During the autumn, with the direct routes open, the movement of wheat to seaports exceeded shipping space, it is understood, and a substantial surplus was built up at the deep water ports. However, during the winter months wheat has to be moved to Canadian and United States ocean ports entirely by rail and it is expected railways will have difficulty keeping all available shipping space supplied.

During the three crop years ending July 31 next, Canada will have exported more than 1,000,000,000 bushels due to huge stock piles built up in the early war years.

GEORGE ARLISS

Distinguished British Stage Star Died in London

LONDON.—Suave, polished George Arliss, distinguished British stage and motion picture actor, died at his London home, aged 77.

His death followed an attack of bronchial trouble. His wife, the former Florence Montgomery, was with him at the time.

A noted character actor, he had played the part of many notables on stage and screen, including Shylock, Dr. Faustus and the founder of the Rothschild banking house.

Since 1935 he had lived in Britain. Prior to that he was well known on the stage in both London and New York and had made a number of films in Hollywood.

One of his best-known performances on the stage was in "The Green Goddess," which ran for a year in London. Later he starred in a film version of the play.

Following his return to Britain 11 years ago he made a number of films in Britain, including "His Lordship," "The Iron Duke," "The Guv'nor," and "East is West."

In 1937 he told the Royal Society of Arts that Britain should not try to compete with United States films. "America can afford to spend \$1,000,000 on a film and still make a profit," he said. "England cannot spend half that sum without courting disaster."

He urged that British film producers concentrate on moderate-priced films "for the English market."

RADIO TELEPHONE SYSTEM

LONDON.—A new system of mobile radio-telephony not connected with fixed stations, has been perfected by the British Home office. It is to be used in trains, as well as in police cars and aircraft, to enable passengers to hold important long-distance conversations during their journey. The use of the new system enables the range to be extended to an unlimited distance, by the use of automatic relay stations.

NAMED ON U.N.O. POST — Paul Martin, Canada's secretary of state, has been named the first Canadian representative on the U.N.O.'s social and economic council.

The Occupation Army Question Is Discussed

OTTAWA.—Fate of Canada's 20,000-man occupation army in Germany and this country's continuing commitment to world security is understood to be occupying a large share of cabinet attention these days.

Prime Minister Mackenzie King is known to have raised the question in discussions with British leaders on his pre-Christmas trip to the United Kingdom.

A reliable source here said it was not known yet whether the occupation army will be succeeded by a small token force of brigade size attached to a commonwealth army or whether Canada will be unrepresented until such time as it is asked to contribute to world security police.

There is understood to be a cleavage in official circles regarding Canada's commitments. There are those who say that without a seat on the United Nations security council Canada should not be expected to contribute to a force whose destinies would likely be controlled by the council. These persons feel Canada should make her chief contribution in an economic way—the way in which she already has won recognition by election to the economic council.

"It seems to me," said a high source, "we can make a better contribution to world security in a practical economic way than having a bunch of troops sitting around Europe in apparent idleness."

He disclosed there had been harsh words and some misunderstanding among Canadian and British officials on the use of Canadian troops in a commonwealth occupation force.

He said Mr. King had disagreed with Field Marshall Viscount Montgomery when the latter suggested it would be "rather nice" to have a Canadian brigade in Europe for ceremonial occasions as sort of commonwealth window dressing.

DRAMA SOCIETIES

Western University Festivals Will Be Arranged By Special Committee

EDMONTON.—Formation of a western university dramatic committee has been announced following a conference of the four presidents of the drama societies of the universities of Saskatchewan, Manitoba, British Columbia and Alberta.

The committee, to consist of five members, will in future make arrangements and decide issues for the annual inter-university drama festival, held this year for the first time at the University of Alberta.

British Columbia will be host to the festival next January. It was decided, subject to the approval of the students' council there, Saskatchewan is second choice.

Alberta and Manitoba next year will produce serious plays, with Saskatchewan and B.C. doing non-serious works, it was decided. It also was decided to set up an adjudication board of three judges from the host university for criticism of the plays and casts, but there will be no competition.

E. Maldwyn Jones, University of Saskatchewan, and Sydney Risk, University of Alberta, were named as a permanent advisory board.

PLAN VICTORY PARADE

LONDON.—Subject to cabinet approval, a great victory parade will be held in London next June 8. A ministerial committee has chosen that day as "Victory Day," suggesting that troops of the Allied powers and representatives of the civil defence services and the Home Guard march in the parade. The King would take the salute in front of Buckingham Palace.

REASON REVEALED

LONDON.—All through the war two escalators at Piccadilly Circus underground station, one of the busiest in London, were idle. The reason has come out. From under the escalators were taken scores of art masterpieces which had been placed in safety there, well underground.

LIVESTOCK MEETING

Convention At Toronto, B.C. An Encouraging Report

TORONTO.—Resolutions regarding the breeding and development of cattle, pigs and horses were passed at meetings of Canadian and Ontario livestock associations, 26 of which were in Toronto for a five-day series of conferences.

The Canadian Jersey Cattle club reported that 1945 was the best year in the organization's history with the greatest number of cattle ever exported. Exports were sent to South Africa, Jamaica, Central and South America, Mexico and Australia.

The Canadian Swine Breeders' Association passed a resolution that a Canadian swine breeding research station be established to study and assist Dominion swine breeders in eliminating hereditary abnormalities in swine breeding stock.

The secretary's report of the Canadian Hackney Horse Society said figures showed registered hackney horses and hackney ponies to be the "fastest growing, most popular breed of the times."

WILL CO-OPERATE

Argentina To Ask Citizens To Eat Less Meat

BUENOS AIRES.—Argentina, one of the world's greatest meat-producing countries, prepared to ask its citizens to eat less meat in order to increase the surplus available to "needy countries."

A government communique said the cabinet's discussions included Argentina's joining the United Nations Relief and Rehabilitation Administration, an increase in the export of grains to neighboring countries and steps to increase the amount of meat available for export.

SUGAR ALLOTMENT

B.C. Farmers In Quebec, Citing Rural Dwellers Not Treated Fairly

VICTORIA.—Claiming that the present system of sugar distribution in Canada is unfair as between city and rural dwellers, the advisory board of the farmers' institutes of British Columbia telegraphed prices board chairman Donald Gordon urging that "immediate steps be taken to rectify the situation by making additional sugar supplies available to bona fide rural residents from existing sugar stocks."

"City residents can buy meats, cakes, candies, pies, etc., at stores without sugar coupons, while the residents of rural areas do not have this privilege and must make all their cakes and candies out of their sugar ration. Consequently the rural resident has less sugar available for canning than city residents, which is more necessary in rural areas removed from city stores," the telegram stated.

CHANGED HIS JOB

Former German Minister To Be Now A Pastry Cook

DUBLIN.—The former German minister to Eire, Dr. Eduard Hempel, has become a pastry cook at 58.

When Germany surrendered last year, the one-time cavalry officer told Prime Minister De Valera that his mission had terminated. Although a career diplomat and the owner of considerable land in Germany, Hempel claims he never supported the Nazi party.

Near the large suburban mansion where he lives with his wife and three children is an Italian restaurant that once provided supplies for the legation parties. Now Dr. Hempel supplies the restaurant with pastry.

"BLUE BABY" TO UNDERGO OPERATION—Gail Mitchell, two-year-old daughter of an R.C.A.F. flier killed over Germany last year, has arrived in Baltimore, where she will undergo an operation which, it is hoped, will save her life. The congenital heart malformation prevents "blue babies" blood from getting sufficient oxygen. "Blue" lips and fingernails result. She is shown with her mother who accompanied her on the trip.

SEIZE EXPLOSIVES AT FARM HOUSE AT BOLTON, ONT.—Nitroglycerine and dynamite allegedly seized by police in a raid on a farm house at Bolton, Ont., is being tested by Prof. Joslyn Rogers, provincial pathologist, University of Toronto. Police arrested Peter Tarnovsky, who lived in the house with his wife and two daughters, and Charles Platten, 26, on a charge of illegally possessing a quantity of explosives. Police describe the haul of dynamite, nitro-glycerine, a rifle, revolver, scores of batteries, fuses, ammunition and tools as "one of the finest safe-cracking outfits."

HEADS FRENCH GOVERNMENT

Successor to Gen. Charles de Gaulle as interim president of France, is Felix Gouin, 61, above. Known as "The man without any enemies," he started as a small town lawyer in his home town of Aix-en-Provence in southern France, which he represented as Socialist deputy in the national assembly for 22 years. In February, 1942, he came out openly against the Nazis when he defended Leon Blum, Socialist party leader and first Socialist premier of France at the Vichy-conducted Riom trials. The Gestapo was loosed on him but he went into hiding and escaped to Britain.

Food Situation In Britain Is Very Serious

LONDON.—The British government, treating the current wheat shortage as a war crisis, has set up a "bottle of bread team" in the cabinet to report directly to Prime Minister Attlee on the food situation, Food Minister Smith announced.

He said in a broadcast that bread rationing might be necessary in Britain, that "all the world must join in a gigantic combined operation against hunger," and continued:

"The government is treating this situation as a war crisis. During the blackest hours of the war, when U-boats were threatening our lifeline, the government set up a special team of all ministers concerned and called it the 'bottle of the Atlantic team'. Now the government has set up a 'bottle of bread team'."

"We shall report to the prime minister personally. This team of ministers will watch every aspect of the situation. One of its more important tasks will be to assist and encourage our farmers to give us more wheat."

Sir Ben announced that bread is going to be darker in Britain, wiped out any immediate hope of more meat, bacon, eggs, poultry—and warned that bread rationing might have to be introduced unless "every scrap" of food is saved.

Simultaneously Agriculture Minister Tom Williams launched a new "dig-for-victory" campaign, warning former victory gardeners that a critical world food shortage makes their backyard efforts just as necessary now as when the U-boat campaign was at its height during the war.

Sir Ben said he had sent urgent cable to Prime Minister Mackenzie King and government heads in other exporting countries asking them to do their utmost to increase food supplies to meet the "appalling" need of hungry peoples. In Europe "starvation, disease and death are threatening thousands," he declared.

Both ministers made statements in the house of commons and appeared at a joint press conference. Later Sir Ben in a broadcast stressed the necessity for utmost conservation of food. The press conference contained some good news as well as bad.

NO ONE TO BLAME

All Parties Did Their Duty During Fire At Churchill

CHURCHILL, Man.—A six-man civilian coroner's jury here returned a verdict that no negligence was involved in the fire which destroyed an army H-hut and took the lives of two exercise Muskox men.

The verdict said all parties detailed for duty carried out their work promptly and to the best of their ability with the available equipment. It recommended that a fire patrol be maintained at night.

Only a blackened foundation of the hut in which the men died remained.

WILL WORK TOGETHER

SYDNEY, Australia.—Australia, New Zealand and Britain have agreed to work together on the establishment of a trans-Pacific air service, the Canberra correspondent of the Sydney Sun reported. The first step will be a conference in New Zealand in March, he said.

STILL NERVOUS

LONDON.—Stuart Hilberd, chief announcer, has celebrated his 21st anniversary with the BBC. In that time he has broadcast more than 10,000 times and says he is still "a little nervous of the microphone."

Irrigation Needs For The Prairies Are Stressed

OTTAWA.—The need of irrigation on the Canadian prairies involving irrigation projects should be made within the so-called dry bowl or chronic crop failure area, W. L. Jacobson, of Regina, told the 39th annual meeting of the Canadian Institute of Surveying.

In that area, said the assistant superintendent of water development for the Prairie Farm Rehabilitation Act, the need is greatest and available water can be used to best advantage.

"The success achieved with irrigation by existing projects in this area provides the strongest possible argument for further development within this climatic zone," he said.

"There is need for irrigation, outside this area but its use must be largely supplementary to dry land farming or ranching. Such developments, having a low cost of construction and maintenance, offer unlimited possibilities for improving living conditions throughout the low rainfall area and provide a principal means of stabilizing agriculture in this area, particularly during periods of drought."

He suggested individual irrigation projects could be increased to 5,000 or 6,000, adding "very substantially to the irrigable area of land over the prairies." Other supplementary irrigation might also be provided through small community projects in accordance with local needs and conditions.

"Such a program of water development, combined with sound farming practices to conserve moisture and control erosion, should help greatly to improve living conditions and make for a permanent agriculture throughout the low precipitation areas of the prairies."

PHYSICAL EDUCATION

New Course To Be Established At University Of Alberta

EDMONTON.—The University of Alberta has been selected for the establishment of the west's first university degree course in physical education, it was announced following weekend conferences of the university presidents of Manitoba, Saskatchewan, Alberta and British Columbia. The new course will be started as soon as feasible, possibly next fall.

In their annual "informal" conference, the presidents agreed upon the necessity of continued federal financial assistance to the universities for training of ex-servicemen under rehabilitation grants, and decided to press for continuation of the assistance for the duration of the demand by veterans for university education.

They also agreed to urge upon the Dominion government the advisability of "lending" to the universities for the duration of the present extreme need any available buildings which could be used temporarily to relieve the accommodation problem, and which otherwise normally would be transferred to War Assets Corporation for disposal.

KEY TO STABILITY

Wheat Dominates Influence On All Other Farm Products

OTTAWA.—Wheat was the key to stability in Canadian agriculture because it exercised a dominant influence on all other farm products, J. C. Taggart, chairman of the agricultural prices support board, said before the annual meeting of the Canadian horticultural council.

Mr. Taggart said wheat dominated the coarse grains and through them influenced the production of meat and dairy products. Stability in wheat thus meant stability throughout the entire industry.

ONTARIO LEGISLATURE

TORONTO.—Premier Drew announced the second session of Ontario's 22nd legislature will open March 4. First session of the legislature was held last summer, a few weeks after the June 4 election in which Premier Drew's Progressive Conservative government won a large majority.

U.S. SCRAP PLANES

WIESEBACH, Germany.—Six thousand planes which cost nearly \$1,000,000,000 are being scrapped by the United States army in Europe because they are considered militarily obsolete and have no peacetime use, officials at air force headquarters said.

SNOW IN DRY BELT

ASHCROFT, B.C.—Weather officials announced that the British Columbia dry belt, a west-central interior area, this winter has received the heaviest snowfall in 49 years. A total of 20 inches had fallen.

MUCH LOOT

NUERNBERG, Germany.—The Germans stole 736 freight train loads of art in western Europe, including paintings, rare books, sculpture and jewelry, the French prosecutor told the international military tribunal.

PALE WESTERN CUTWORM WARNING

(Experimental Farm News)

The pale western cutworm has not been a serious pest of grains in the prairies for several years. Normally, insect reaches outbreak numbers during periods of wet drought, and populations are reduced in years when the rainfall is about normal. Since 1942, propitiation in most areas of Alberta, and Saskatchewan has been subnormal, and in the drier districts, reports of pale western cutworm damage have been observed during the past two seasons. On the basis of the forecast for 1946 further damage is expected over a larger area. L. A. Jacobson of the Dominion Entomological Laboratory, Lethbridge, Alberta.

Farmers on the prairies who have suffered loss from cutworms in the past should be prepared to combat this pest again during the coming season. This is particularly the case in those districts where crop yields were below normal in 1945 because of inadequate rainfall during the growing season.

Newly hatched pale western cutworms can be destroyed by starvation in the early spring, if after they have appeared to feed and develop their food supply is destroyed for a period by cultivation. Spring cultivation should be delayed until wheat or growth and weeds are from one to two inches above the ground. At that time the field should be cultivated and left black for a period of at least ten days before seeding.

A field destroyed by cutworms should not be reseeded until the worms are about mature. Since this period occurs after June 15, such crops very seldom reach maturity and are useful only as feed.

It is possible to prevent pale western cutworm infestation by cultural methods. As the moths which fly in August and September, always select a place where the soil surface is soft and dusty in which to lay their eggs, the location of infested fields is usually determined by the condition of the soil surface during the previous year. Fields which are to be summer-fallowed must be worked early and cultivated thoroughly in June and July to destroy all weeds. All work on fields to be protected from cutworm infestation must be stopped by August 1 and left undisturbed until September 15. This will allow a crust to form on the surface of the soil, thereby making the ground unsuitable for egg laying. Stork should not be allowed to run over the summer-fallow to break up the crust and thus allow egg laying.

When cutworm outbreaks are expected, stubbing in of cereal crops should be avoided as these fields are invariably infested.

During the coming season farmers will be well advised to be on the alert for pale western cutworm damage and be prepared to undertake preventative measures for ensuring reasons.

Greater Wheat Acreage Needed to Meet Famine

Lincoln Elmhurst Urges Government to Increase Acreage Objective

The Dominion Government was today urged to request Canadian farmers to grow the maximum wheat acreage this year and to accept delivery from farmers of all wheat grown in order to alleviate wide spread famine conditions, in a white forwarded to Prime Minister King by Cecil Lamont, president of the Northwest Farmers' Association.

"From a review of the world wheat situation it is apparent that there must be drastic upward revision in the Dominion Government's agricultural production objectives for wheat acreage in 1946. Wheat acreage objectives for this year have been set at 24,000,000 acres for 1945, namely 24,000,000 acres for all Canada. This is 5,312,200 acres less than the acreage sown to wheat in 1940. The government is fully aware of the shortage of food prevailing throughout the world and to meet this situation it is imperative to increase cereal production as the most effective means of alleviating the critical famine conditions prevailing.

HERE and THERE

Sun Spots And Your Radio

Scientists say that Sun Spots are responsible for the radio reception which radios have been giving. At a height of from sixty to two hundred miles from the earth the air is a million times more rarefied than it is at the surface. Because the ultra violet light of the sun is not absorbed by this rarified atmosphere strange things happen. The few molecules of air are partially disintegrated and electrically charged. The scientists call these electrically charged air molecules "ions." This region is therefore called an ionosphere.

The layers of the ionosphere are named and lettered according to their temperature changes and the degree of electrification of the ions. Thus the D layer (40 to 60 from the earth's surface, absorbs or attenuates radio waves. Just above the D layer is a maximum ionization or E layer. Beyond the 120 miles lies the uppermost or F layer. If it were not for this ionosphere it would be impossible to send radio waves across the ocean. Radio waves are high waves of great length which travel in straight lines. Because of the curvature of the earth we could see a powerful beacon across the ocean and for the same reason we could not see or receive waves from a radio station. The ionosphere reflects radio waves so that they bounce back and forth between it and the earth. In this way radio waves reach their destination.

Now the sun spots are supposed to be great clouds of an intensely hot nature some distance from the sun. These clouds emit great quantities of ultra violet light than usual. This causes a greater electrification of the ionosphere which in turn interferes with the reflection of radio waves. Thus the interference and fading of your radio.

Indian Time Bomb

You may expect the Indian Nation to expect to renew their demand for complete self government. If full independence is not granted they may wait. The time is ripe for a showdown with Johnny Bull. The subject people of the near and far east are seething with revolt against their former master's charges and counter charges of interference have been heard at Britain in the United Nations Conference. An Indian armed uprising against Britain would have world wide sympathy. Britain is ready to grant home rule to India but only on terms which the nationalists cannot accept. They insist that Britain turn over the government of India to the

"Within six months Canada will be harvesting a new crop and Canada's grain handling machinery is such that this wheat could be poured into food shortage areas immediately thereafter. There is no universal foodstuff that can be produced in the quantities required as rapidly as wheat bread. From a nutritional standpoint such foods as meat, fats, dairy and poultry products are desirable for a balanced diet but their production and movements to market require greater time. With shipping space plentiful wheat is the logical foodstuff to cope with starvation conditions prevailing throughout large areas of the world.

"While we are in accord with the long range agricultural policies of the government such practices it would seem temporarily must be set aside in favor of an imperative course which will ensure the greatest possible production of life sustaining food which can be produced and delivered in quantities most readily. To this

PEOPLE ARE SAYING that Maxwell House Coffee is extra delicious. It's true... because Maxwell House is "Radiant-Roasted" to capture the full goodness of its supremely fine blend!

Cluck and hark! Indian wants some assurance that or... The nationalists look upon Pakistan much as Eastern Canadians would the formation of a new country out of the prairie provinces. Pakistan would lead to civil war and anarchy. The Indians blame all their evils on Britain. It hardly enters the mind of the hindoo that his lot may be as bad or much worse under complete freedom.

Main Highways To Be Hard Surfaced

Proposed highway improvement program for Alberta this year includes hard surfacing of main highways according to information which the Alberta Motor Assn. has received from the provincial department of public works.

Details of the program will be announced when preliminary studies have been completed by the departmental engineers.

Hon. W. A. Fallow, minister of public works has stated that the program includes hard surfacing to a considerable extent the main highway from the international boundary north to Edmonton. It says this highway has carried a big traffic load in the war years and now it must be put in proper shape to handle prospective postwar traffic, including a flood of tourists.

The program also contemplates improvements to the Trans-Canada highway between Calgary and Banff and the Jasper highway from Edmonton west.

NOTICE OF PREPARATION OF ASSESSMENT ROLL

Town of Raymond Assessment Roll 1946

Notice is hereby given that the assessment roll of the Town of Raymond for the year 1946 has been prepared and is now open for inspection at the office of the Secretary-Treasurer from ten o'clock in the morning until four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until 12 o'clock noon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the Secretary-Treasurer.

Dated this 13 day of February, 1946

W. L. Jones, Secretary-Treasurer

and we urge that the Government request Canadian farmers to produce all the wheat within their powers of production in 1946 and furthermore that the government undertake to accept delivery from farmers of all wheat grown this year.

SERVICE

Cubmaster W. H. Smith of the 29th Toronto Cub Pack lists three legitimate reasons for absence from his Pack meetings. They are sickness, absence from town, and conducting a symphony orchestra. So far only one cub has the right to claim the symphony orchestra excuse. He is Michael Spivak, who recently conducted the Toronto Symphony Orchestra in the Toy Symphony. When the number was announced nine year old Michael walked out on to the stage of Toronto's Massey Hall and exchanged his bearing with Sir Ernest McMillan, for the latter's baton, mounted the podium and conducted the orchestra. Michael's father, Elie Spivak is concert master of the Toronto Symphony which Michael has conducted on other occasions.

MR. E. ROBERTSON,
Assistant to Director,
Line Elevators, Farm Service,
WINNIPEG - Manitoba

During the past summer, Lincoln Elevator agents throughout the Prairie Provinces were asked to estimate the percentage of the total barley acreage, in their own districts, occupied by different varieties. Reports, herein summarized, were received from 1,961 grain buyers.

In Manitoba, last year, 32.6% of the barley acreage was seeded to March, 28.1% to O.A.C. No. 21, 21.1% to Cartons, 9.7% to Wisconsin, 8.3% to Samalta, and 9.1% to other varieties. The recommended varieties, O.A.C. No. 21, Mensury and March, Wisconsin, Samalta and Rex, averaged 84.2%.

O.A.C. No. 21, the leading variety in Saskatchewan, occupied 27% of the acreage, and was followed by Plush, 13.8%; Hannehen, 13.7%; Prospect, 12.7%; Regal, 9.2%; Freda, 9.1%; Rex, 7.4%; and other varieties, 7.1%. Varieties recommended for Saskatchewan last year were: O.A.C. No. 21, Plush, Freda, Regal, Prospect, Rex and Hannehen, occupied 84.7% of the total Saskatchewan acreage.

In Alberta, O.A.C. No. 21, Newal and Treb were the varieties of greatest importance occupying 29.6%, 21.7% and 22.0%, respectively, of the acreage, while Olli occupied 15.5%, and others, 10.4%. The recommended varieties, O.A.C. No. 21, Olli, Newal, Sanalta, and Treb constituted 92.6%.

Although the percentage of non-recommended varieties is not high for the averages of each province the above figures do not preclude the possibility that varieties are being grown in localities for which they are not recommended. The importance of growing varieties recommended for the various soil zones should be considered by all farmers when plans are being made for seeding operations.

Lady Baden Powell, Chief Guide of the world, and widow of the founder of the Boy Scout and Girl Guide-movements will arrive in Canada for a tour of the country in May.

General Dwight D. Eisenhower has nothing but the highest praise for Boy Scout Movement, of which his young son is a member. "My own experience has been" said the General "that anyone who has learned scouting has learned something that is going to be very useful to him in life."

Hon. N. E. Tanner, Minister of Lands and Mines in the Alberta Provincial Government, has been appointed Provincial Commissioner of the Boy Scouts Association in Alberta, by His Excellency the Governor General, the Chief Scout for Canada. Mr. Tanner has been active in scouting for some time as District Commissioner for the Cardston area, and a member of the Provincial Executive Committee. The post has been vacant since the death of Colonel J. H. Woods of Calgary.

Get In Touch With Your Representative In The Alberta Legislature Now

The Alberta Government will soon be making appropriations for a high

way program that has been prepared by the Department of Public Works, which provides for the building and bringing up to standard of Modern Tourist Highways, Main Highways, District Highways and Local Development Roads.

We have waited a long time for such a plan. It must not be allowed to be side tracked now. Do your part by pushing your provincial government representative for action and

ing your neighbors and any organization of which you are a member to do likewise. Or if you prefer, send a note to the Alberta Motor Association in Calgary, Edmonton or Lethbridge.

DO THIS NOW The government will give public opinion a hearing. PUBLIC OPINION MAKES ITSELF HEARD. The A M A is conducting a vigorous campaign, but it needs

your support. Remember, good roads
are in YOUR interest. Do YOUR
part to get them. If you would also

IT REALLY IS SMART to serve Maxwell House. This famous blend of coffees has *extra* fragrance and flavor — *extra* smooth, full body. It's *always* "Good to the Last Drop!"

Raymond

Oats are becoming a less important crop each year in southern Alberta for horses but more important for cattle and sheep. Tractors have reduced the horse population greatly throughout the southern part of the province and, in fact eliminated them entirely from many farms. Winter feeding of cattle and sheep has been increasing each year, particularly during the war years, and there should be a tendency for it to continue to increase with the expansion of the sugar beet industry and other special crops for irrigated land. Oats form an important part of all growing and fattening rations.

WORLD HAPPENINGS
BRIEFLY TOLD

A total of \$415, was paid in Toronto police court recently by persons charged with failing to have radio licenses.

A sale of butterflies at Oxford Circus, London, yielded £126 (\$1,930). One specimen, a Cardamine butterfly, fetched £22 (\$99).

The great Leuna synthetic oil plant at Halle, once one of the chief cog in the German war industry, now is producing baking powder.

The government of China has offered \$13,400 (\$24,300) to Oxford University for five three-year scholarships in Chinese studies.

Indian manufacturers may capture the post-war trade in cheap ready-made mosquito nets which Japan used to supply in thousands of bales before the war.

Natural rubber is now flowing in a steady stream to the United States from China, purchasing agents of the Reconstruction Finance Corporation disclosed.

The Lincoln copy of the Magna Charta, 730-year-old document brought over for the World's Fair and then kept in New York because of the war, has been handed back to Britain.

The Allies have adopted a program overhauling the German taxation system and sharply increasing rates on property and income to put the country's crippled finances on a pay-as-you-go basis.

The Royal Astronomical Society of Canada announced that Paul H. Nadeau of Quebec is winner of the Chant Medal given to the Canadian who has done most for astronomy in Canada in the last year.

"The Years Ahead"

Million Dollar Book Stimulates Canadian Y.M.C.A.

Seldom, if ever before, has any publication of the Y.M.C.A. received such unanimous and enthusiastic approval as has "The Years Ahead"—a plan for the Canadian Y.M.C.A. in the next decade.

Charles Bauckham, President of the Sterling Trusts Corporation, and a member of the Canadian Y.M.C.A. study committee responsible for the report, in a recent speech referred to it as "a million dollar book".

The first edition has already been sold out, and a new printing is on the press.

The report was received at the annual meeting of the National Council in Niagara Falls in October, and in order to stimulate its use and to get its recommendations at work in the various Y.M.C.A.'s across Canada, the staff of the National Council gave priority in their fall plans to the conduct of a series of one evening conferences of key people, and quickly swung into action with these ferences have been held in Winnipeg, Saskatoon, Regina, Calgary, Edmonton, Victoria, Vancouver, New Westminster, Moose Jaw, and Lethbridge.

These local key people's conferences will be followed by regional conferences initiated by the National Council but with local planning committees. The National Council will provide a team of speakers made up of at least one layman, and two national secretaries, and already the host associations have agreed to sponsor and promote conferences for their region.

There is little doubt that "The Years Ahead" will be the topic of discussion in practically every committee of every Y.M.C.A. across Canada during 1946.

The study represents the most ambitious job of self-analysis yet undertaken in the Canadian Y.M.C.A. Officials of the National Council of the Y.M.C.A. of United States were frankly amazed that the Canadian movement had been able successfully to complete such a report.

Will Be Missed

Connecticut Man Who Gave Out Halloween Nickels Is Dead

Emil A. Bussemey, the "Nickel Man," is dead at the age of 70, and Halloween won't be the same any more for youngsters in the Oakville district of Waterbury, Conn.

Mr. Bussemey was a real estate dealer and building contractor, but all the children knew him as the man who gave them shiny nickels on Halloween. He liked to do it, he once told a reporter, because when "I was a kid I never had a nickel to spend."

His distribution of five-cent pieces started on Halloween in 1929, when he was recovering from an accident in which both his legs were broken. He and his wife had forgotten to obtain a supply of candy and cookies for the usual youthful Halloween callers, but managed to scrape up enough nickels to present one to each of the children who rang their bell that night.

The fact that nickels were to be obtained at 201 Buckingham street spread among the juvenile element, and next Halloween the Bussemey's had sixty-two callers. The number increased yearly until 1938, when Mr. Bussemey handed out 587 nickels on Halloween.

Bogart's Wife On Same Telephone
PHONE LINE IS AUTHORITY FOR \$1,000—Louis Bromfield, author-farmer who recently went surety with the Luba Telephone Co. to ensure telephone service to his farm home near Mansfield, O., today "owns" the company but is trying to "refuse" ownership. Company directors, who did their own maintenance work, sold to George Hubbel of Lucas, who borrowed \$1,000 from Bromfield to launch the deal. Tired of trying to keep the outmoded equipment going, Hubbel mailed Bromfield a bill of sale for the company in repayment of his loan. Bromfield is famed for his conversations over the rural party line which has 142 subscribers along its line. It was this same telephone, over which Humphrey Bogart wooed Lauren Bacall, the pre-wedding conversations being interspersed with requests to eavesdroppers to hang up.

Art Collection

Presented By Viscount Lee To The University Of Toronto's Hart House

Dark-eyed and vivacious for all her classification as a medieval art expert, Yvonne Hackenbroch of the British Museum staff confessed to one unwomanly trait—she held in secret for six years and "didn't tell anyone."

The secret was the donation of a priceless art collection by Viscount Lee of Fareham to the University of Toronto's Hart House, it was sent to Canada early in 1940 but the announcement was withheld until some three weeks ago on request of Lord Lee.

"I've waited for this visit for six years," said Miss Hackenbroch, whose presence was necessary before the treasure could be unpacked. "I knew in 1939 that I was coming to Canada but I didn't tell anyone."

Miss Hackenbroch revealed that her "woman's touch" with art objects prompted Lord Lee's stipulation that the collection not be unpacked until she was here to catalogue it. For this reason it has been hurried in vaults since its arrival.

Shortly before the war she was assigned by the British Museum to rearrange its medieval exhibition of ivory, jewelry and metal work.

"Now just picture a collection of dozens of spoons from the Commonwealth to the Georgian period—nobody looks at such things and remembers," she said. "So I set out a table exactly as it looked in Elizabeth's day."

"I tried to put as much feminine charm into it as possible without being extravagant. Viscount Lee liked the arrangements and that's how I came to meet him."

Miss Hackenbroch estimates it will take "several months" to catalogue Lord Lee's gift—one of the world's greatest collections of antique gold, silver and bronze metal-work, enamel, jewelry and illuminated manuscripts.

Develop Industry

Britain To Import German Scientists For Peace Projects

Britain has plans to import leading German scientists to aid development of industry in a far-reaching scientific drive which will embrace housing, clothing and transport, it was learned.

Important equipment already has been brought from Germany to be passed on to the research organizations of some of Britain's leading industries.

The scheme includes building 250 houses of various designs to be used for experimental purposes and grants to industrial research associations totalling £750,000 (\$3,337,500).

The experimental houses are being erected at the building research station of the Department of Industrial and Scientific Research near Watford, Hertfordshire.

Methods of heating, lighting and ventilation will be tested in the houses. The acoustic properties of buildings—of great importance to apartment dwellers—will also be studied.

The £750,000 grant will be shared by more than 30 trade research associations and investigations will affect shoes, wool, food, paints and varnish, cotton, linen, fuel, gas and electricity, paper, rubber, shipbuilding, automobile and other industries.

PHYSICAL EDUCATION ASSN.

The national convention of the Canadian Physical Education Association, will be held at Jasper, Alta., June 21-23, it was announced by officials. It will be the first time the meeting has been held in Alberta.

Keep knives in a wooden rack in the kitchen drawer. They dull quickly if they rub against other knives or utensils.

Good Tax Dodgers

Island Inhabitants Have Evaded Ireland's Collectors For 40 Years

The 200 independent inhabitants of the Islands of Turn and Turbot, who have, declared themselves an untaxable republic, have beaten tax collectors again.

In a dawn motor boat raid ordered by the Galway council to collect £12,000 (\$53,400) in current taxes and arrears, bailiffs found the two islands—lonely outposts in the Atlantic off the city of Clifden on Eire's west coast—deserted.

By some grapevine telegraph the citizens learned of the raid. They pooled all the livestock on the common, so there could be no seizure, and evacuated en masse the previous night to "visit their relatives" in Aran. That island lies about 25 miles south of Turbot in Galway Bay.

The bailiffs returned empty-handed but they were not the first. Galway council has tried in vain for 40 years to collect rates and land annuities, claiming the islands are under county jurisdiction.

Markets Available

But Meat Supply Short Owing To Canada's Livestock Situation

An inclination on the part of western Canadian farmers to "get out of livestock" was seen as "very disappointing," by Lt. Col. J. H. Tremblay, Canadian trade commissioner and agricultural specialist for north west Europe.

"We now have the markets but are short of supply," Col. Tremblay stated. "We had the English bacon market and we could have it if we could supply it; but we can't."

Col. Tremblay is touring the Dominion to contact officials in agriculture and industry before leaving to take up his post at the Canadian embassy in Paris. He is gathering first hand information as to what is available for export to France, Belgium and Holland which are the only countries at present specified in his trade territory.

Health
LEAGUE OF CANADA
presents
TOPICS
of
VITAL
INTEREST

ORGANIZE FOR HEALTH!

It is fitting that once a year during "Health Week"—all citizens should take time to consider what has been accomplished in the program of health for Canadians. With the co-operation of Dominion, Provincial and Municipal Departments of health, departments of education, schools, churches, service clubs and other public-spirited organizations an effort is being made to again call to the attention of all Canadians the need for organizing for health.

Science has made enormous contributions in the field of preventive medicine in our lifetime. And yet, failing to apply the discoveries of science, we go on allowing health and life to be sacrificed because we are not sufficiently informed to spend reasonable time or pass adequate legislation for the prevention of sickness and the conservation of life.

The statement that in the war years 50,000 industrial workers were unable to work on account of sickness on an average day, and that of 1,260,000 men examined for military service 357,000 were unfit for military duty of any kind, should be sufficient to give pause. In spite of our existing milk-borne disease and our failure to control venereal disease, only one province in Canada has a province-wide law enforcing pasteurization of milk and only two provinces have adequate legislation for medical examination before marriage. This is an evidence of the fact that either Canadians, generally are still uninformed as to the urgent need for action or extremely lethargic.

In either case, there is a vast need for a widespread educational campaign. Briefly, if the facts are disseminated widely enough and often enough there will be a widespread demand for action.

"Health Week" is but a brief intensification of the year-round effort of your health departments and the Health League of Canada to make you health-conscious.

British Fashions

Fabrics Made Of Plastics Will Be Used

If the Board of Trade and other government departments listen to the pleadings of the British fashion designers to use some of the materials developed by scientists during the war, women should have some fun with their new clothes in the next twelve months. There is one fabric, a satin material which technicians call "photoluminescent". It glitters in the dark with the same ghastly glow as a luminous watch face. It was employed to cover the landing paddles used at night on aircraft carriers. The fabrics made of plastics for use in equatorial war zones will give designers enormous scope. One material, used by Britain's Royal Air Force for rust-proof insect screening, should be popular for office suits, for ink, grease or stains can be removed without blemish with a damp cloth.

SAVES CHILD FROM FLAMING CRIB—Judy Jamieson, four, of Niagara Falls, Ont., was saved from her burning crib by her aunt, Lillian Jamieson, when fire broke out in her room. They re-enact the rescue.

Were Badly Needed

Canadian Nurses Sent Coats To Nurses In Holland

One thousand coats and four hundred capes have been sent by the nurses of Canada to nurses in Holland.

Receipt of this generous gift has just been acknowledged in a letter received by Miss Fanny Munroe, president of the Canadian Nurses Association, from Miss C. H. Menalda, president of the Nurses Association of the Netherlands. Miss Menalda writes:

"It is quite impossible to give you an expression of our thankfulness for giving so much; we can hardly believe that it is a reality. We are so happy to be able to disperse all those useful articles among our nurses, who need these things so badly."

The clothing was collected under the direction of the Nurses Associations of the provinces and shipped by the Canadian Nurses Association to Holland.

The Saxons were mentioned for the first time by Ptolemy about the middle of the second century.

Farm Problems

Illustration Stations On Private Farms In Each Province

The Illustration Station program of farm organization, management, and factual studies relating to practical problems of farm production, under the aegis of the Division of Illustrated Stations, Dominion Experimental Farms Service, has been further advanced on the 209 units located on private farms in widely separated communities in each province. The work conducted on these units has been supervised and directed from the Experimental Stations or Sub-Stations in the various provinces at Agassiz and Creston, B.C.; Beaverlodge, Lacombe, and Lethbridge, Alberta; Indian Head, Scott, Melfort, and Swift Current, Sask.; Fort William, Kapuskasing, and the Central Experimental Farm, Ottawa, Ont.; Lennoxville, Normand, Ste. Anne de la Pocatiere, and Makamik, P.Q.; Fredericton, N.B.; Kentville, N.S.; and Charlottetown, P.E.I.

Most of the mystery plays of the Middle Ages were enacted with masks.

To Protect Milk

Urges That Milk Be Sold In Red Or Green Bottles

A touch of color for the front doorstep is recommended by research workers at the Banting Institute in Toronto, who urged that milk be sold in red or green bottles to protect the milk from light and loss of riboflavin (vitamin B₂). J. A. Ziegler, institute research worker, said: "Riboflavin, necessary for growth and proper function of the eyes, is 66 per cent. lost when milk is left in the sun for two hours during mid-winter. Mr. Ziegler explained. In hot weather it is destroyed three to four times as fast."

"He said Toronto dairies objected to the plan, claiming people would not buy milk in colored bottles."

Skin Eruptions

There is a clean, stainless, penetrating antiseptic oil that brings speedy relief from the itching and discomfort. Not only does this healing antiseptic oil promote rapid and healthy healing in open sores and wounds but boils and simple ulcers are also relieved. In skin affections the itching of Eczema is quickly stopped. Pimples—skin eruptions dry up and scale off in a very few days. This same is true of Itch, Salt Rheum, Itching Toes and Feet and other inflammatory skin disorders. You can obtain Moon's Eucalypti Oil in the original bottle at any modern drug store. Satisfaction or money back.

Fruit Scarcity

Has Affected The Health Of Children In Britain

Britain's children, according to a doctor, have been forced to adopt an 18th century fruit diet.

Dr. Elizabeth Gourlay, the London school medical officer, says: "There has never been so much skin trouble among children."

"This is caused by lack of Vitamin C, contained in fruit, Vitamin D, contained in fats, and calcium. As regards Vitamin C, we have been reduced to almost 18th century plight."—London Daily Mail.

Instead of waiting for your ship to come in, paddle your own canoe out to meet it.

OUR COMPLETE SHORT STORY YOU GOTTA BE STUBBORN

By OLIVE BURTON FOSTER

Copyright The Chicago Sun Syndicate

The hitchhiker ran up, breathless. "Edgar Hancock nodded and stretched a muscular arm to open the door."

"Thanks." The hitchhiker settled himself. "You live around here?"

"In the valley," Edgar said tersely. "Apple farm." He gave the hitchhiker a sidelong glance. He was young, not more than twenty-five. Edgar's age would top his by only a year or so.

"Bad year for apples," the young man observed.

"Yeah," Edgar's voice was flat. "Bad year."

A bad year and a bad day. Edgar tried to close his mind to the white frame farmhouse. But Mary's troubled eyes were closer than the steering-wheel. And the marigolds in the yard, blooming gold and brave in the dried-up skeleton of the garden. A little like Mary's brave spirit when she kept her head high against the fading of their hopes.

"I tell you, Edgar," Mary had placed her roughened fingers on his arm. "I'm afraid you're going to find out too late what a mistake you're making. Don't sell, Ed. Give it another try."

"Leave me alone!" The unhappy clanking of her defenses made his voice brutal. "I know what I'm doing. I've worked. God! I've bent my heart out for these miserable acres. What did we have all spring—rain! rain! And cold. The trees look sickly. And the potatoes. That leaf hopper got them. If we'd tried that DDT—but we couldn't get it in time.—Result, not enough spuds to carry us through the winter, we're losing money every minute we keep on here." With swift, angry strides he crossed to the lane. Mary plucked the baby from the floor by the kitchen door and hurried after him.

"It's because you're city-bred you're letting it get you down," Mary was speaking swiftly, against time. "You have to learn to take the long view. Everybody does, if they want to amount to anything."

"It's sucked up all our money, hasn't it? It's taken every cent of my war gratuity, and what we could borrow, hasn't it. And for what?" The harshness in his voice covered a troubled bewilderment. "To get ourselves deeper in the hole every day we're here. Veterans' opportunity." The words came on a quick strained note. "Opportunity to lose your shirt!" He got into the car and started the motor.

The wait of her voice reached him as he pulled away.

"You're so stubborn, Edgar. If you'd only listen to reason."

"No use," he muttered. His hard young eyes were fixed steadily on the road. "I'm getting out now. The land's made a sucker out of me. In the city I'll get a job with a steady wage."

But he had had his first real quarrel with Mary. And it had shaken him beyond bearing. And he was saying goodbye to a dream. A dream that had been like the breath of life to Mary and him.

"It will be our own little bit of country, to develop and turn to account," Mary had said so long ago. "We'll have our roots here, and we'll have children, and we'll be a vital part of a great country."

"SMOKE?" the casual question brought Edgar back with a start. He took a deep breath, and tried to push the dream away. You could be just as close to your country working for a wage. Forget the dream.

"Thanks." He reached for the pack the young man held out. Then, startled, he looked more closely.

Young Pete in "D" Company had lost both arms like that in the Anzio beachhead. He'd tried to hide himself, to huddle away from eyes that might pity. They'd been in hospital together. Edgar had been lucky. His wounds were superficial.

The young man had not missed the embarrassment.

"Oh, I'm getting right handy with 'em now," he observed. "I've got 'em so I just say the word, and they jump."

Edgar gave him a quick, admiring glance. "It must have taken time."

"Brother, you said it," the hitchhiker grinned ruefully. "But I figured I'd have to beat it sometime. I wouldn't get far in the world just settin' aursin' two stumps. So now there's a job waiting for me. In the city. A job where I can go places," half-smiling, as though the picture he saw was pleasant.

Edgar drove silently for awhile. "You've sure got what it takes," he said at last.

"Oh, I had my moments," the young man said. "There were times when I felt like throwing these gadgets in the drink." He turned to Edgar. "But it sure taught me something. It taught me that you gotta be stubborn in this man's

world. You sure gotta be stubborn." Stubborn? Suddenly the pattern formed. Edgar grinned.

"Sure." He nodded emphatic agreement. "You gotta be stubborn. You sure need to be that."

They were on the outskirts of the city now. Already the streets were lying in dejected untidiness, as though now that the freshness that was summer was gone, they longed only for the snow to cover their weariness. Edgar turned to his passenger.

"Tell me where to drop you," he said. "And drop by to see us sometime. Apply Valley Farm. That's where you'll find us."

He drove on to the young man's street. Reaching to open the door, Edgar observed again.

"Yeah, crops were poor this year. But give us another year—Boy!" He watched the young man step out of the car. "Apple Valley Farm," he called after him. "Put that down in your date book." He turned the car about. His eyes, watching the miles ahead, were resolute. Somewhere a bonfire's smoke, drifting, had scented the soft Indian summer twilight with a nostalgic pungence. Edgar raised his head and took long, satisfying draughts. "Home. Gosh, it was wonderful. To get in and fight for."

IS MME. CHIANG'S RIVAL—Teng Ying-Chao, wife of Chou En-Lai, chief Communist party negotiator in China and China's No. 2 Communist in her own right, is a political rival of Madame Chiang Kai-Shek. She is the only woman attending the political consultation conference where for the first time members of parties other than the Kuomintang can have voice without fear of reprisal.

Easy Going . . .

By ANNE ADAMS

To one side, please! Smart style and wonderful wearability are wed in Pattern 4929. Shirtwaist chic plus side-button wraparound. As easy to make as it is to wear.

Pattern 4929 comes in sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44. Size 16 takes 3½ yds. 35-in. Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size Name, Address and Style Number and send orders to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

FARM MECHANIZATION

Mechanical improvement and the use of rubber tires have greatly increased the utility of tractors, making them suitable for a broad range of work in farm operations. The introduction of smaller sized tractors has made possible greater mechanization of the smaller farms, and the development of equipment which can be mounted on the tractor has made the tractor suitable for row crop production.

ACTS 2 WAYS TO RELIEVE MISERIES OF BRONCHITIS

Now get real relief from coughs, soreness and congestion of bronchitis—this double-action way that actually

WORKS 2 WAYS AT ONCE. PENETRATES deep into bronchial tubes with soothing medicinal vapors. STIMULATES chest and back surfaces like a warming poultice. KEEPS WORKING FOR HOURS. To get all the benefits of this combined PENETRATING-STIMULATING action, just rub throat, chest, and back with Vicks VapoRub at bedtime. Instantly VapoRub goes to work—2 ways at once as shown above—to ease bronchitis coughing, loosen congestion, relieve muscular soreness, and speed restful, comforting sleep. Often by morning most of the misery is gone. Get relief from bronchitis distress tonight with double-action, time-tested Vicks VapoRub. . . Try It! VICKS VAPORUB

A New Shrine

Names Of Civilian War Dead Enshrined In Historic Abbey

Westminster Abbey, historic burial place of Britain's great, has a new shrine. It contains the first lists of nearly 60,000 civilians killed by enemy action in the United Kingdom during the Second Great War, compiled by the Imperial War Graves Commission.

Names of rich and poor, great and humble, now are enshrined in the Abbey where princes, statesmen and poets lie, and where Britain's King's are crowned.

The shrine, designed by Sir Charles Peers, surveyor to the Abbey, is fixed to the west wall of the chapel of St. George, close to the tablet to the 1,000,000 service dead of the First Great War and a few yards from the bright poppies surrounding the tomb of the unknown soldier.

The lists are in four volumes, bound by the late Douglas Cockerell in red leather. The shrine measures about three feet square on the front, and is two feet deep. One volume lies open and a page is turned daily.

The present typewritten lists will be replaced by printed or embossed lists when the record is complete. Relatives may consult duplicate lists in London and Edinburgh, at the Imperial War Graves Commission offices.

NO TIME TO SPARE

In New York, an Italian was being examined in court after applying for citizenship.

He answered correctly questions as to the name of the President, and the capital of the United States. Then came this:

"Could you become president of the United States?"

"No," was the reply.

"Why not?" persisted the official.

"You please excuse," begged the Italian. "I very busy right now sell da peanuts."

Cockroaches have survived since the age of the dinosaurs.

LOSS TO FARMERS

Breakage Of Eggs Is The Cause Of Serious Loss

Breakage is the greatest single cause of loss in marketing eggs in Canada. Greater shell strength is needed. It is not a matter only of the loss on the cracked or broken eggs themselves but the loss in value of other eggs and packing material through sweating. There is also the unknown loss at point of production, in the nests, in gathering, and in handling on the farm, and in the consumers' home, according to a survey made by the Dominion Department of Agriculture.

It is not a question of whether egg shells are weaker now than before the war, but just a plain statement of fact that present egg shells are not sufficiently strong to withstand the hazards of transportation. Trains are heavier, jolts are more severe, and handling less careful. Something has to be done now to improve shell strength. Selection, breeding, feeding can all be brought to bear. It is something in which all phases of the industry can take part. Eggs with thin porous shells should not be used for setting.

Open New Mine

Fast Coal Reserves In New United Kingdom Coal Area

A new coal area containing vast reserves of virgin coal has been opened up in Nottingham, England. The shaft which is to be sunk at a cost of about one and a half million pounds constitutes one of the most important of the recent developments in the United Kingdom coal mining industry, writes the Yorkshire Post. The plant when completed will include the most modern machinery in the world. It is estimated that the area contains 125,000,000 tons of proved coal. This means that, on the basis of a million tons annual output, work will be provided for some one thousand men for the next 125 years. The shaft is expected to be completed at the end of 1948.

Invention Perfected

New Unbreakable Glasses Are Proof Against Any Damage

Spectacles which can be trodden on, dropped or bent without being damaged have been perfected by Professor A. M. Low, the British scientist.

Professor Low is the inventor of the bifocal lenses used for both long and short sight, and the contact, the invisible lens which fits over the eyeball. His new unbreakable glasses weigh less than half an ounce.

They are made from one piece of fine wire with the tiny half-moon lenses set just below the line of vision. The frames can be bent double without harming them and the glasses themselves can be dropped or kicked without fear of damage.

MUST KEEP BUSY

"Busy as a beaver," is an old saying. But this animal has good reason to keep busy. If he stops using his chisel-like teeth for very long, they will grow to such lengths that eating is impossible.

Columbus found cotton growing in the West Indies, and the natives making cotton cloth.

Chain Of Evidence

An Explanation Of The Derivation Of The Phrase

It is told that in olden times in Ireland, there was a chief who owned a wonderful chain. If put around the neck of a guilty man it squeezed him to suffocation, but if put about the neck of an innocent person it expanded and fell to the ground.

As someone has remarked, the links of this chain were probably symbolic of cross-questionings. And from that comes our phrase "chain of evidence." — Book-of-the-Month Club News.

... "And Then There Were None"

Harold was just an old sheep-counter. Every night, before he got to sleep, he counted thousands of sheep . . .

Then one day an Experienced Friend suggested maybe it was the caffeine in the Tea and Coffee he drank that kept the sheep jumping over the fence . . .

So Harold STOPPED tea and coffee, and changed to POSTUM . . .

And right away he only got a few hundred sheep over the fence before sleep overcame him . . .

And in a few nights only a dozen . . .

And then there were none!

Many people can safely drink tea and coffee. But others are upset by the caffeine these beverages contain. If you find yourself sleepless, nervous, irritable—try changing to Postum. You'll like its rich, heart-warming flavor. Not like tea, not like coffee, just a grand flavor all its own.

Easy to fix—make Postum right in the cup just by adding boiling water or hot milk. Costs less than 1¢ a serving.

PROTECT MOTORISTS FROM POISON FUMES

There is a simple solution to the problem of keeping the air in private garages free of poisonous carbon monoxide fumes when car motors are running, according to officials of the Alberta Motor Association.

The suggestion is of particular interest especially as carbon monoxide takes its toll of lives in Alberta each year.

The procedure, as offered by the American Rubber Mfg. Company of Oakland Cal. is to slip over the exhaust pipe of a car a piece of flex like hose, one end of which is equipped with a coupling that fits the muffler, the other end connects with a carry off pipe running to a central vent system which carries the fumes to the roof where they are disposed of by a suction fan.

The carry off pipes are of the galvanized drain pipe variety. They can be installed easily by a local sheet metal shop, with as few or as many outlets as are needed.

The hose itself, developed and marketed by the company is a corrugated, flexible exhaust hose 2 and a half inches in diameter, and made of special synthetic rubber said to be superior to natural rubber when it comes to resistance to oil gasoline and heat.

TO BE POPULAR as a hostess, serve Maxwell House Coffee. It contains choice Latin-American coffees . . . the finest obtainable. It's blended by experts with traditional knowledge and skill.
